

Dual Antenna Wireless HDMI Extender with IR

Wireless signal
up to 100m

Part# CE-H26X11-S1

Allows wireless transmission and extension of HDMI audio and video signals to 330ft to make your home entertainment or games reliable and stabilize

- Automatically paired Wireless 5G technology reliably extends HDMI signal up to 330ft (100m), line-of-sight to a remote HDMI display without complicated cable or wire installation
* **Note: the transmission distance will vary depending on building layout, electronic interference, walls and partitions, other environmental conditions, and maybe much less than the maximum**
- Dual 5dBi antenna with 2T2R data rate technology prevents signal interference and provides optimal reception quality
- Supports high-definition vivid video up to 1080p @60Hz Full HD resolution, low-bandwidth H.265 compression video and streaming flawless LPCM 2-ch (48KHz) R/L stereo audio
- Built-in one-way IR extension modules allows remote controlling the playback at the distant display
- Compatible with HDMI 1.3, HDCP 1.4. Work with PC or Mac system and HDMI equipment, such as Blu-ray player, Set-top box, AV receiver, Cable/Satellite box
- Plug-n-Play, no driver installation or Wi-Fi connection required

Common Applications

- Conference room, Show room, Lecture hall, Church, Exhibition, Home entertainment, Shopping center, Restaurant, Educational facilities
